PATIENTS NAME: SH. RAMESHWAR LAL

DATE: August 10, 2021

AGE & SEX: 73 Y / M

CONSULTANT.: DR. SURENDER BENIWAL DM

FNAC EXAMINATION

A/33/2021

SITE :- CT guided FNAC From lung mass.
(Imprint made from CT guided Biopsy)

MICROSCOPIC EXAMINATION

Smear show loose cohesive clusters of multilayered cells, 3D clusters as well as few dispersed cells, having scanty to mild amount of cytoplasm, pleomorphic hyper chromatic nuclei and distinct nucleoli in the background of few inflammatory cells & RBCs.

IMP.:- Findings suggestive non small cell Carcinoma.

ADV :- HPE.

NOTE :- Slide Given with report.

MSCT SCAN OF THORAX:-

MSCT imaging was performed using sub-millimeter thin plain & contrast scan of thorax from thoracic inlet to diaphragm.

Heterogeneously enhancing soft tissue density mass with speculated margin measuring approximately 29x23 mm is seen in anterior basal segment of right lower lobe. Focal pleural tag is noted. P/O Metastases.

Fibrotic changes and area of ground glass opacity are seen in bilateral lower lobes.

Few calcific nodules are seen in bilateral upper lobe.

Multiple sub centimeter to enlarged lymph nodes are seen in pre tracheal, pre sub cranial, aorto pulmonary and bilateral hilar region, largest measuring approximately 23x19mm.

Fracture of left 5th to 10th rib is seen.

Minimal free fluid is seen in left pleural space.

No pericardial effusion is seen.

Arch of aorta & great vessels appear normal.

Trachea & main bronchi appear normal.

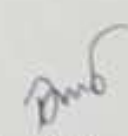

Visualised portion of esophagus appears normal.

Visualised part of liver and both adrenal glands appear normal.

IMPRESSION:-

- > Heterogeneously enhancing soft tissue density mass with speculated margin in anterior basal segment of right lower lobe P/O Metastases.
- > Fibrotic changes and area of ground glass opacity in bilateral lower lobes.
- > Few calcific nodules in bilateral upper lobe.
- > Multiple sub centimeter to enlarged lymph nodes in pre tracheal, pre sub cranial, aorto pulmonary and bilateral hilar region.
- > Fracture of left 5th to 10th rib.
- > Minimal free fluid in left pleural space.

Advice: - Clinical Correlation

Dr Dinesh kumar Prajapat
