Public Notice

Subject: Reply to Tata Memorial Hospital's Public Notice.

This public notice is in response to letter issued by Tata Memorial Hospital on 23rd Nov-24 in context of former cricketer's wife's diet.

Since the diet (known as D.I.P Diet) is directly prescribed by me, so it becomes my moral responsibility to issue this public notice in the interest of the public at large.

Objection 1: Diet followed by the former cricketer's wife doesn't have any evidence base and is an unproven remedy.

Reply: *The DIP diet is scientifically proven and highly effective. Thousands of people across India and abroad have successfully followed this diet and experienced significant improvements and reversal in their health conditions. It is also implemented with full efficacy at our HIIMS Group of Hospitals. For comprehensive scientific evidence and proof, we encourage the public to read the book, "World's Best: The D.I.P Diet."*

Objection 2: Only Proven treatment for cancer is surgery, radiation & chemotherapy.

Reply: *The reality is that conventional cancer treatments like surgery, radiation & chemotherapy are not only unscientific but also dangerous, and there are substantial evidences showing that they can actually promote the spread of cancer, increase mortality, and cause further suffering for patients. For more information, we encourage you to read the book "Rabbit Tortoise Model for Cancer Cure."*

Invitation for an Open Debate

Since the public notice issued by Tata Memorial hospital was signed by 262 oncologists, I invite them to an open debate and urge them to present the evidence supporting their claim that surgery, radiation, or chemotherapy can improve either the lifespan or the quality of life of patients.

Dr. Biswaroop Roy Chowdhury
Co-founder

(On behalf of doctors & patients of HIIMS group of Hospitals)
