# WHEN YOU ARE FOOLED IN THE NAME OF A PANDEMIC

In natural disasters like tsunamis, earthquakes, or floods, all living creatures—humans and animals are affected indiscriminately. However, if a pandemic is declared and you observe that only humans with access to media and medical aid are affected or dying, while poor farmers, beggars, underprivileged individuals, and animals remain largely unaffected -

**KNOW YOU ARE FOOLED!**

# THE PANDEMIC CALENDAR

## JANUARY

## 2025

### Important Days & Observances

- 01 January - English New Year
- 10 January - World Hindi Day
- 12 January - National Youth Day (Swami Vivekanand Jayanti)
- 13 January - Happy Lohri
- 15 January - Army Day/ Pongal/ Makar Sankranti
- 23 January - Netaji Subhash Chandra Bose Jayanti
- 26 January - Republic Day of India
- 28 January - Lala Lajpat Rai Jayanti

## TEST THE TEST (RT-PCR) KIT

The results of RT-PCR tests to detect viruses like COVID-19 or Monkeypox often appear as random as rolling a dice. On average, we found that 10% of living samples (human or non-human) tested positive for COVID-19, with repeat tests giving inconsistent results. Similarly, for every 25 Monkeypox tests conducted, 1 returns positive.

Do it yourself (DIY) and find the results of the latest media-driven sensation: "The HPMV (Virus)." Question the accuracy and reliability of such tests, and critically assess the data being presented.

- 19 February - Shivaji Jayanti
- 23 February - Maharishi Dayanand Saraswati Jayanti
- 26 February - Maha Shivaratri/ Shivaratri

# PANIC CREATES A PANDEMIC

MEDIA-INDUCED ALARM :

It begins with **Media-Induced Alarm**, where sensationalized reporting triggers widespread fear. This leads to **Panic**, heightening public anxiety and hysteria. Prolonged stress weakens the immune system, resulting in **Stress & Anxiety** that can manifest as **Fever & Flu-like Symptoms**. These symptoms, coupled with inconsistent test results (**Fraudulent Diagnosis**), create confusion and misdiagnoses. Misguided or unnecessary interventions (**Lethal Pseudo-Treatment**) further exacerbate the problem, ultimately leading to avoidable tragedies and **Death**. The above flow chart underscores the dangers of panic-driven responses fueled by misinformation.

# THE PANDEMIC CALENDAR

## MARCH

## 2025

### Important Days & Observances

- 02 March - Ramadan Start
- 14 March - Holi
- 23 March - Shaheedi Diwas
- 29 March - Hindi New Year
- 31 March - Ramzan Id/Eid-ul-Fitar

# NO NATURAL PANDEMIC IS POSSIBLE

A review of history reveals that widespread sickness among humans or animals occurs only under specific conditions: contaminated air or water, compromised hygiene, malnutrition or famine, or the introduction of harmful substances into the body, such as through mass vaccination or adulterated food. Natural pandemics, therefore, are unlikely without these contributing factors.

# THE PANDEMIC CALENDAR

## APRIL

## 2025

### Important Days & Observances

- 01 April - April Fools Day
- 06 April - Rama Navami
- 07 April - World Health Day

- 17 April - World Haemophilic Day
- 18 April - Good Friday
- 22 April - Earth Day

# PANDEMIC of the Educated Human

Humans who have undergone structured education (through schools, colleges, etc.) often become emotional beings rather than intelligent, rational ones, losing their innate survival instincts. A lie repeated multiple times—especially by the media—is often accepted as truth by them. In contrast, animals and less literate individuals tend to remain unaffected by such false alarms, relying instead on their natural instincts and resilience.

# THE PANDEMIC CALENDAR

**MAY**

**2025**

- 09 May** - Guru Rabindranath Tagore Jayanti
- 12 May** - Buddha Purnima
- 31 May** - World No Tobacco Day

## PANDEMIC FOR PROFIT

Media-declared pandemics have become tools for economic shifts, widening the gap between the rich and the poor. The poor grow poorer while a select few become super-rich. Fear and panic make it easier to exploit and manipulate the masses. The Oxfam Report of 2021 highlights how the false alarm of COVID-19 devastated the economies of less privileged communities. Vaccines, while profitable for a few, often add to the suffering of the masses, amplifying inequality and hardship.

# THE PANDEMIC CALENDAR

- 21 June** - International Yoga Day

# WHEN FLU BECOMES A PANDEMIC

Flu or Influenza-Like Illness (ILI) is a common ailment that affects every human an average of 2 to 3 times a year. However, when such a routine illness is labeled a "pandemic," gullible individuals often fall victim to harmful medical experiments, including toxic drugs and vaccinations. This transforms an otherwise manageable condition into a real, man-made crisis, creating a pandemic born not of nature but of fear and misinformation.

# THE PANDEMIC CALENDAR

**JULY**

## TRACK THE INITIAL SOURCES OF PANDEMIC NEWS

There are a few places and centers around the world that operate with opacity and maintain secrecy about their internal affairs. China is one such example. Have you ever wondered why China, a country known for its tight control over information, suddenly began generously sharing live footage of a pandemic unfolding within its borders? Is it truly a pandemic or a “**plan-demic**,” strategically designed in collaboration with government bodies and individuals poised to profit from the chaos?

# THE PANDEMIC CALENDAR

## AUGUST

## 2025

- 27 August - Shri Ganesh Chaturthi

# FEVER CURE DURING A "PLAN-DEMIC"

If you experience a fever—a natural response of your immune system to fight infection—consider handling it calmly and privately. Sharing your condition might lead to forced isolation or hospitalization. Instead, immerse your legs in a bucket of warm water at 42°C for about 30 minutes. This simple remedy often helps reduce fever. If the fever persists, you can repeat the process.

# THE PANDEMIC CALENDAR

## SEPTEMBER

- 30 September - Maha Ashtami

# FLU-LIKE SYMPTOMS DURING A "PLAN-DEMIC"

# THE PANDEMIC CALENDAR

## 3 STEP FLU DIET

### Day 1 (Liquid)

<u>Weight of patient (kg)</u> 10		(glasses of fresh Citrus fruit juice)
	+	
<u>Weight (kg)</u> 10		(glasses of coconut water)

### Day 2 (Fluid)

<u>Weight</u> 20		(glasses of Citrus fruit juice)
	+	
<u>Weight</u> 20		(glasses of coconut water)
	+	
<u>Weight x 5</u>		(gm of Tomato + Cucumber)

### Day 3 (Solid)

<u>Weight</u> 30		(glasses of Citrus fruit juice)	} Breakfast
	+		
<u>Weight</u> 30		(glasses of coconut water)	} Lunch
	+		
<u>Weight x 5</u>		(gm of Tomato + Cucumber)	} Dinner
		Normal home cooked food	

For other flu-like symptoms, follow the "3-Step Flu Diet" for 3 days. This method, based on observational studies conducted by the National Institute of Naturopathy (N.I.N) - Ministry of Ayush, has been proven to aid recovery, even in severe cases of flu.

## OCTOBER

# No Difference between Normal Cells and Cancer Cells

Medical science has yet not been able to identify a single consistent structural, biochemical, or immunological marker that draws a dividing line between a normal cell and a cancer cell.

This concept becomes even clearer when explored in the context of leukemic cells, as highlighted by the references below:

- Weis, p.: some introductory remarks on the cellular basis of differentiation. Jour embryonic and exp. morphology, 1:181,1953
- Henderson, E.S.: Acute lymphoblastic leukemia. In, Cancer Medicine, (Ed Holland., and Frei, III, E.), Lea and Febiger, Philadelphia 1974, p.1174

# BIOPSY, PET SCAN & MAMMOGRAM CAUSE CANCER

Since no definitive difference exists between normal and cancer cells, conventional diagnostic methods such as biopsy, PET scans, and mammograms rely on arbitrary markers like the shape and colour of the cell nucleus or the quantification of sugar consumption by specific cells. However, these methods have been shown to be overly general, misleading, and lacking a solid scientific basis. In fact, it is now well-established that procedures like biopsies, PET scans, and mammograms can themselves contribute to the development of cancer.

# SPONTANEOUS CANCER REGRESSION – FEVER THERAPY

Spontaneous cancer regression is often observed in patients who reject conventional treatments such as chemotherapy, radiation, surgery, or immunotherapy. Tumor disappearance or symptom remission frequently occurs in patients experiencing feverish infections.

Additionally, inducing artificial fever, such as through lower-leg hot water immersion, has been noted as a potential tool for providing symptomatic relief to patients.

## TIME AS MEDICINE

Resetting the circadian clock has been observed to reverse tumorous growth and alleviate pain and weakness in patients. This can be achieved by implementing a restricted eating window, where patients consume food only between 10 AM to 6 PM. This approach involves an 8-hour eating period (10 AM to 6 PM) followed by 16 hours of fasting (6 PM to 10 AM).

### For evidences read :

# ZERO VOLT AS MEDICINE

A common factor linking all lifestyle diseases, including cancer, is **inflammation**, which is largely a result of electron deficiency. When we come into direct contact with the Earth, we absorb electrons, which neutralize our body's voltage, effectively bringing it to zero. This process enhances immunity and creates conditions favourable for recovery from various lifestyle-related illnesses.

## Forevidences read:

## FOOD AS MEDICINE

Overactive angiogenesis in the body is a key factor in the development of cancer and tumour growth. Consuming foods that help regulate the angiogenic process—such as fruits and raw vegetables—while avoiding foods that promote angiogenesis, such as animal products and dairy, has been shown to reverse cancerous processes in the body.

### For evidences read:

- Quercetin glucosides promote ischemia-induced angiogenesis, but do not promote tumour growth. *Life sciences*, 2013, 93.22: 814-819.
- Quercetin attenuates cell survival, inflammation, and angiogenesis via modulation of AKT signalling in murine T-cell lymphoma. *European journal of pharmacology*, 2016, 781: 60-68.
- Quercetin inhibits angiogenesis by targeting calcineurin in the xenograft model of human breast cancer. *Journal of the National Cancer Institute*, 2002, 94.5: 391-398.

# CONCLUSION

- Not undergoing any diagnosis is superior to biopsy, PET scans, or mammograms, as these contribute to tumour or cancer progression.
- Not undergoing treatment is more effective than chemotherapy, immunotherapy, surgery, or radiation, as these methods are associated with increased mortality and poorer quality of life.

The safest and most proven way to reverse tumour or cancer growth or other lifestyle diseases, is through :

Food as medicine
